Subject: RE: proposed response

Perhaps ".... and rigorous air quality protections along the path ..."

My understanding is that DEQ permits abide by established air quality requirements, rather than ensuring particularly high air quality or high standards.

Re: noon press conference, for your thoughts:

Members of the policy team **in the Governor's Office** staff met with the demonstrators to hear their concerns. **North Carolinians are deeply connected to the land, and environmental stewardship is critical to economic development.** DEQ spent months asking the pipeline developers tough questions during the permit **application process** questions. **They and** will continue to hold the pipeline **company** accountable **by** insisting on clean water, effective sedimentation control and **high standards** for air quality along the path of ~~the~~ construction.
